

Dear parents,

I am writing to inform you that this morning we have found out that one of our Year 9 students has tested positive for coronavirus. We have identified all close contacts and asked those students to self-isolate. Public Health England have asked us to reiterate that people should be self-isolating if they have been identified as a close contact of someone who has tested positive. **Your child has been identified as a close contact.** Your child's attendance will be unaffected by having to self-isolate.

As outlined in our risk assessment, we have enhanced cleaning procedures in the academy. We are in daily contact with Public Health England who have informed us that our cases are in line with what they would expect in the local area.

The continuation of learning for students who have been asked to self-isolate is a priority for us; students have been issued with some paper-based work today. As of tomorrow, they will have their work set on Frog. Please let us know immediately if you have any concerns about remote learning.

In line with the national guidance we recommend that your child now stay at home and self-isolate until the end of the day on Friday 18 December 2020, returning to the academy after the Christmas holidays.

We are asking you to do this to reduce the further spread of COVID 19 to others in the community. If your child is well at the end of their period of self-isolation, then they can return to usual activities.

Other members of your household can continue normal activities provided your child does not develop symptoms within their self-isolation period. This means that siblings of your child should continue to attend school.

Please see the link to: Guidance for contacts of people with confirmed coronavirus (COVID-19) infection who do not live with the person

<https://www.gov.uk/government/publications/guidance-for-contacts-of-people-with-possible-or-confirmed-coronavirus-covid-19-infection-who-do-not-live-with-the-person>

What to do if your child develops symptoms of COVID 19

If your child develops symptoms of COVID-19, they should remain at home for at least 10 days from the date when their symptoms appeared. Anyone with symptoms will be eligible for testing and this can be arranged via <https://www.nhs.uk/ask-for-a-coronavirus-test> or by calling 119 .

All other household members who remain well must stay at home and not leave the house for 14 days. This includes anyone in your 'Support Bubble'.

The 14-day period starts from the day when the first person in the house became ill. Household members should not go to work, school or public areas and exercise should be taken within the home. If you require help with buying groceries, other shopping or picking

up medication, or walking a dog, you should ask friends or family. Alternatively, you can order your shopping online and medication by phone or online.

Household members staying at home for 14 days will greatly reduce the overall amount of infection the household could pass on to others in the community.

If you are able to, move any vulnerable individuals (such as the elderly and those with underlying health conditions) out of your home, to stay with friends or family for the duration of the home isolation period.

Please see the link to the PHE 'Stay at Home' Guidance:

Symptoms of COVID 19

The most common symptoms of coronavirus (COVID-19) are recent onset of:

- new continuous cough and/or
- high temperature and/or
- a loss of, or change in, normal sense of taste or smell (anosmia)

For most people, coronavirus (COVID-19) will be a mild illness.

If your child does develop symptoms, you can seek advice from the nhs.uk website at <https://www.nhs.uk/conditions/coronavirus-covid-19/check-if-you-have-coronavirus-symptoms/>. If you are concerned about your child's symptoms, or they are worsening you can seek advice from NHS 111 at <https://111.nhs.uk/> or by phoning 111.

How to stop COVID-19 spreading

There are things you can do to help reduce the risk of you and anyone you live with getting ill with COVID-19

Do

- wash your hands with soap and water often – do this for at least 20 seconds
- use hand sanitiser gel if soap and water are not available
- wash your hands as soon as you get home
- cover your mouth and nose with a tissue or your sleeve (not your hands) when you cough or sneeze
- put used tissues in the bin immediately and wash your hands afterwards
